CXS Venti

4110 012 113 00

EN ISO 16321-1

UV Protection

Elastic Band

EN Closed-face safety goggles with a clear polycarbonate lens. They offer the wearer excellent ergonomics thanks to adjustable elasticated fabric straps. The closed-face design helps to protect against liquids, dust, gases and vapours. The goggles feature indirect ventilation at the top of the frame. They are certified to the EN ISO 16321-1 standard. They also meet the requirements of optical class 1, which guarantees high optical clarity for prolonged wear and protects the wearer against medium-energy particles in accordance with mechanical strength class C. The lens provides protection against UV385 ultraviolet radiation. Excellent compatibility with CXS Spiro respirators. Suitable for the construction, engineering, agricultural, laboratory and automotive industries.
